

SOC ANALYSIS – STEP-BY-STEP WORKFLOW

Learn the core analyst loop to solve this investigation.

Baseline: Corporate Network v1.0

1 TRIAGE

What looks unusual?

2 SOC TOOL ANALYSIS

Does evidence support the suspicion?

3 CORRELATION

How do the clues connect?

4 ESCALATION

Do I have enough confidence?

5 RESPONSE

What operational action changes?

6 DEBRIEF

What did I learn?

NETWORK VIEW – LIVE TRAFFIC

→ Normal Traffic (Two-Way)

→ Possible / Unresolved

→ Suspicious (One-Way)

SLOW MOTION ☒

INTERNAL USER ZONE

INTERNAL SERVICES ZONE

EXTERNAL INTERNET ZONE

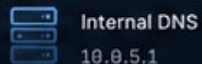

UNRESOLVED EXTERNAL ACTIVITY

WS-4471

Employee Workstation

10.0.5.12

Internal DNS

10.0.5.1

CDN Service

198.51.100.20

Unresolved Signal
External Activity

Only confirmed systems and observed traffic are shown.
Unresolved signals will become clear as you collect more evidence.

LEGEND

↔ Two-Way: Normal communication

↔ Unresolved / Unknown

→ One-Way: Suspicious / Probing
